

Stand For The Family Alarming Evidence And Firsthand Accounts From The Front Lines Of Battle A Call To Responsible Citizens Everywhere By Sharon Slater

Sharon Slater, president of Family Watch International, has come to understand up close and personal the powerful forces mounted against the family. Ten years ago, as a stay-at-home mom, Sharon first learned about the efforts to undermine the traditional family. Since that first exposure, Sharon has worked as a pro-family advocate at the United Nations and at the national, state and local level to preserve and protect the institution of the family. Now, in her new book, she shares firsthand accounts, backs them with alarming empirical evidence and, as the title of her book suggests, extends A call to responsible citizens everywhere to Stand for the Family. Stand for the Family was written with three main goals in mind: To make people aware of what is happening behind closed doors at the UN and elsewhere to undermine the family. To equip legislators, policymakers, educators and responsible citizens with the knowledge and tools to take an effective stand for the family. To serve as a gathering tool to cause good people throughout the world from all professions and walks of life to come together, to network together to defend the traditional mother/father family. Already the book has been well received by community and church leaders, policymakers and individuals from around the world. At the recent World Congress of Families in Amsterdam, Sharon presented a copy of her book to a King from Ghana and he requested a second copy to give to the President of the International Criminal Court, who he was meeting with a few days later. Another person requested five copies for the Canadian Parliament. One young woman said she was captivated and stayed up much of the night reading. A couple who read the manuscript before the book went to print used the information in the marriage chapter in family home evening to help their teenagers overcome misconceptions about homosexuality and same-sex marriage and to help them understand that it is not hateful to protect marriage. The book is not a profit-making venture for Sharon or her family. All of the proceeds go to benefit Family Watch International and the work to defend the family.. stand for the family alarming evidence and firsthand. the black family 40 years of lies daniel patrick. cma finds evidence of potential mis selling in leasehold. ivan milat the evidence by the late investigator brian raven. your family past present and future wait but why. 3 alarming stats from florida under stand your ground. new evidence demand justice for jeffrey weinhaus. the impact of evidence based practice in nursing and the. the covid 19 bullshit even further alarming evidence that. stand for the family alarming evidence and firsthand. study 52 terms abnormal psychology chapter 17 quizzes. the ghost bride netflix official site. mps warn of mounting evidence over chinese and russian. could unchecked government power be more dangerous than. dispatch reveals evidence of ts entertainment s allkpop. is the latest kennedy tragedy possible evidence of. john kerry says there is irrefutable and alarming. this chart shows an alarming rise in business insider. rohingyas a terror threat ndtv finds little evidence of. senate republicans must stand up for the rule of thehill. uk parliament report alarming evidence of chinese. stand your ground immunity also applies to florida cnn. mueller investigators gathered alarming significant. florida s stand your ground law incentivizes violence. binning school and family alcohol education a. further evidence does not support hydroxychloroquine for. evidence piling up lockdowns do not work the washington. alarming evidence dash services. tim allen goes on the view tears into alarming level. family planning gender differences and infant mortality. how to fix a drug scandal behind a the guardian. family planning in developing countries an unfinished. syria inaction would be alarming says william bbc news. oregon judicial department family law self help. an analysis of trump supporters has identified 5 key. mobile phone radiation may harm brain daily mail online. chronic constipation an evidence based review american. proposition 8 ruling ignores precedent evidence and. bizarre evidence andrew cunanan s trail of terror. sitting risks how harmful is too much sitting mayo clinic. amnesty reveals alarming impact of online abuse against women. children s screen time australian institute of family. climate change united nations. home fritolay. stand for the family sharon slater 9780977881499.
