"Pressestimmen 'Nobody is better than Mangelsen' -Drake Magazine" "The Last Great Wild Places: Rewilding Through Photographs. When I look at the images it makes me feel good, and it's difficult to imagine that others will not share the same experience of awe and magnificence. While we won't be able to get back what we've lost, there still are plenty of awe-inspiring landscapes and animals who can fill our hearts and heads with joy. I hope The Last Great Wild Places enjoys a broad and global readership. It is perfect for people of all ages including youngsters. And, what's great about this book is that all one needs to do is look at and marvel at the photographs and imagine what it would be like to be there, as was Mr. Mangelsen. It also would be a valuable lesson to imagine what a tragedy it would be if, in the future, assembling a book like this would be impossible to do because the use of the word 'wild' would be utterly and singularly misleading."

• "Marc Bekoff, Psychology Today **'This magnificent book will catch your breath. And once your breath returns to normal, and you turn the page, well, your heart will stop.'** Within the covers of The Last Great Wild Places is the life work of accomplished photographer Thomas Mangelsen. It is a work spanning forty years during which he has captured the beauty of the natural world on seven continents. **Photography this good deserves special treatment, and the publisher has left no stone unturned in creating a book of the highest quality.** The reproductions are exquisite" and the photographs, had they been printed on separate sheets, could have been mounted and hung on a wall. This is as close as it gets to a gallery visit and what better exhibit to take in than the enthralling work of Thomas Mangelsen. "

-NATIONAL OUTDOOR BOOK AWARDS "ber den Autor und weitere Mitwirkende Thomas D. Mangelsen is among the most distinguished natural history photographers in the world, and his honors include being named Conservation Photographer of the Year by Nature's Best Photography. His work has been published widely, including in National Geographic and American Photo, as well as exhibited in museums and galleries. Todd Wilkinson is a professional journalist and the author of several books, including Last Stand: Ted Turner's Quest to Save a Troubled Planet, and the critically acclaimed Science Under Siege: The Politicians' War on Nature and Truth. Jane Goodall, known for her landmark chimpanzee study, is the most recognizable figure in conservation today."
