

The Math Behind The Magic Fascinating Card And Number Tricks And How They Work By Ehrhard Behrends

"Reseña del editor A magician appears able to banish chaos at will: a deck of cards arranged in order is shuffled--apparently randomly--by a member of the audience. Then, hey presto! The deck is suddenly put back in its original order! Magic tricks like this are easy to perform and have an interesting mathematical foundation. In this rich, colorfully illustrated volume, Ehrhard Behrends presents around 30 card tricks and number games that are easy to learn, with no prior knowledge required. This is math as you've never experienced it before: entertaining and fun! Biografía del autor Ehrhard Behrends, Freie Universität, Berlin, Germany." 10 secrets behind the most famous magic tricks revealed. secret of row 10 a new visual key to ancient pascalian puzzles. mathematical magic tricks americana. two tests to measure your psychic powers liveabout. card magic tricks revealed cool card trick secrets. calendar california state university dominguez hills. the math behind the magic fascinating card and number. the math behind the magic fascinating card and number. professor bio page the great courses. amaze your friends with these fantastic maths magic tricks. a history of card magic a short history on card magic. the top 10 coolest magic the gathering cards of all time. all the games on this site dr mike s math games for kids. the goblin game mathematics stack exchange. mathematical card magic fifty two new effects co. can you believe your eyes ted talks. math and magic english. 10 math tricks that will
